

Planting Corn & Soybeans Following A Cover Crop

Trent Sanderson

Clare, IL

Our Farm

- **Corn, soybeans, small grains & red clover**
- **No-Till/Strip-Till since 2007**
- **Cover crops since 2012**
- **Cow/calf operation**

Soybeans following a cover crop...

- Plant green
- 140,000 on 30" rows
- Chemical termination
 - 3 nights consistently above 38 degrees
 - Timing between 10am-2pm
 - Sunny & 75 degrees perfect world
 - 1 quart glyphosate, 15 gallons/acre
- Mechanical termination
 - Works for cereal rye
 - WAIT until it has fully pollinated to roller crimp
 - Crimp after planting

Corn following a cover crop...

- 32,000 on 30"
- Chemical termination
 - As soon as conditions allow
 - Best to wait 2 weeks after termination to plant
- Nitrogen program
 - Strip-till 80 units
 - Y-Drop the balance
