Tue 2/20/2024 4:40 PM

To:Carly Zierke <carly.zierke@practicalfarmers.org>

February 2024

Equipping farmers to build resilient farms and communities.

Cover crop lessons from the 2024 Annual Conference

This year's annual conference featured a wealth of information on cover crops.

We heard from farmers **Roger Wilcox** of Pierson, Iowa, and **Bruce Willems** of Correctionville, Iowa, on planting into cover crops for both corn and soybeans. They gave attendees an in-depth look at their planter set-up. Roger also shared detailed videos of his planters.

View Roger's videos about the set-up for his <u>Kinze soybean planter</u> and <u>John</u> <u>Deere corn planter</u> to brush up or learn something new ahead of planting season.

PROGRAM UPDATES

Join us on March 4 for the Midwest Covers and Grains Conference

Monday, March 4 | 8 a.m.-4 p.m.

Join us for the Midwest Covers and Grains Conference, taking place this year in Mankato, Minnesota!

This one-day event will explore topics on everything from incorporating oats and rye in rotations to direct marketing small grains. You'll learn from other farmers and advance your understanding of how diversified rotations and cover crops can work for you.

View the speaker line-up and register today! Pre-registration closes Feb. 26.

Explore the impact of cover crops on fieldwork suitability with

Join a multi-farm research project investigating if cover crops contribute to earlier spring field access and rutfree fall harvests.

You'll participate by completing a weekly survey where you'll share insights on whether you could perform field activities without compromising integrity.

Apply to join the trial by April 10.

IN THE FIELD

"Practical Cover Croppers" videos on planting green

Thinking ahead to planting season, explore tips from experienced cover croppers in the "Practical Cover Croppers" video series.

Watch <u>"Planting Soybeans Green Into</u> <u>Cereal Rye Cover Crop</u>" and <u>"Corn</u> <u>Planter Setup for Planting Green."</u>

Roller crimping cereal rye in soybean production

PFI research cooperator **Jon Bakehouse** compared two timings for roller-crimping and planting soybeans at dough and anthesis stages.

He discovered roller-crimping at anthesis stage provided higher netreturns. <u>View the report from his</u> <u>2022 research project</u> or watch the video <u>"Roller Crimping Cereal Rye in</u> <u>Soybean Production"</u> to learn more.
