Instructors Participating

Listed on the inside back cover of this report you will see a map of Minnesota. The farms included in this report are located in the shaded area on the map; Southwest, South Central and Southeast Minnesota. The instructors who work with Farm Business Management students are located in the shaded area and their office locations are listed below:

MN West College

<u>Office Location:</u>	<u>Instructor:</u>	
Granite Falls	Tim Radermacher	320/226-1003
Jackson	Mike Dierks	507/847-7937
Lakefield	Chad Benda	507/662-6271
Marshall	Paul Lanoue	507/929-2626
	Troy Otto	507/929-2627
	Dennis Schroeder	507/929-2626
Truman	Kent Janssen	507/776-2974
Welcome	Bob Roesler	507/728-8400
	Justin Williamson	507/728/8400
Worthington	Mike Dierks	507/372-3427

South Central College

<u>Office Location:</u>	<u>Instructor:</u>	
Blue Earth	Al Roesler	507/526-2894
Fairfax	Brad Augustin	507/426-8355
Faribault	Gene Kuntz	507/332-5845
	Mark Wehe	507/332-5836
	Doug Wertish	507/332-5837
Glencoe	Myron Oftedahl	320/864-3378
Mankato	Pam Uhlenkamp	507/389-7288
	Tina LeBrun	507/389-7391
Montgomery	Ira Beckman	507/492-2141
Nicollet	Robin Schwieger	507/232-3916
Sleepy Eye	Wayne Schoper	507/794-4241
Waldorf	Aaron Brudelic	320/894-2033

Riverland Community College

<u>Office Location:</u>	<u>Instructor:</u>	
Adams	Barry Kurtz	507/438-2126
Albert Lea	Barry Kurtz	507/438-2126
Austin	Eric Deters	507/259-6262
	Dave Marr	507/438-7076
Kenyon	Jennifer Smith	507/384-8676
	Rex Quam	507/301-1140
Leroy	Wayne Pike	507/251-1937
Plainview	Tom Anderson	507/259-6269
Owatonna	Shawn Erickson	507/301-5726
St. Charles	Jack LaValla	507/951-9453
Spring Valley	Dan Miller	507/259-6270

The preparation of this report was done under the direction of Al Brudelic, retired Dean of the Southern Minnesota Center of Agriculture; and Bradley Schloesser, Dean of the Southern Minnesota Center of Agriculture. Directing in a supervisory capacity were: Dr. Richard Shrubbs, President, Minnesota West Community & Technical College; President Keith Stover, South Central College; Dr. Jeffery Williamson, College Provost, Minnesota West Community & Technical College; and Dr. Nancy Genelin, Vice President of Academic Affairs, South Central College.

A total of 1,167 farm business records were submitted to the Analysis Center prior to the date that averages were processed. On the basis of accuracy and completeness 1,167 of these were included in this report. This report contains whole farm financial summaries and enterprise data for the major crop and livestock enterprises produced in Southwest, South Central and Southeast Minnesota.

Additional data and a downloadable PDF file can be accessed at the MnSCU Farm Business Management website at:

<http://www.fbm.mnscu.edu>

Introduction

Farm Business Management Education Programs have been a part of the Agriculture Education program in Minnesota since 1952. From the early cooperative efforts of the State Department of Education and the Department of Agriculture Education at the University of Minnesota, the program has expanded to serve over 5,000 farm families annually in six farm management regions. Programs are now administered and managed by the Minnesota State Colleges and Universities System through the Technical Colleges.

The purpose of farm management education is to help farm families achieve their farm business and family goals. This is done through improved management, organization and efficiency of their farm operations. This purpose has not changed over the years.

To accomplish these purposes, programs have been organized to conform to the following guidelines:

1. Farm families enroll in specific management courses.
2. Each course has specific goals and objectives.
3. Courses are offered in sequence and farm operators are expected to enroll in the first of the sequence of courses.
4. There is continuity to each course. Each leads to the next course in the sequence.
5. Instruction occurs both in the classroom and at the farm with the farm family.

Programs organize their courses around the same central theme:

- Level 1 - Introduction to Farm System Management
- Level 2 - Farm System Analysis and Evaluation
- Level 3 - Interpreting and Modifying Farm System Management Plans
- Level 4 - Farm System Trends and Projections
- Level 5 - Integrating Current Information into Farm System Plans
- Level 6 - Examining the Context of Farm System Management Plans

Like most educational programs, students benefit from the instruction in relation to how much effort they put into study and application. Some farm operators have benefited more and some less, depending on how seriously they studied the results of their annual business analysis and the kinds of decisions they have made as a result of their analysis.

Farm Business Management education programs became course/credit based in 1992. Each individual enrollee completes a needs assessment with the instructor, after which the student enrolls in coursework to meet these needs. A typical farm business management student registers for 10 semester credits per year. The purpose of this effort is to more adequately address the needs of the individual farmer, making enrollment even more beneficial.

OVERVIEW OF FARM FINANCIAL STATEMENTS

Farm Income Statement -- pages 9-12

This is a summary of income, expenses and the resulting profit or loss from operations. The Farm Income Statement is divided into two parts -- Income and Expenses. The income portion provides a detailed picture of cash farm income flowing into the business. The Expense portion of the statement is further divided into three sections providing cash expenses, inventory changes, and depreciation and other capital adjustments. Inventory changes, depreciation and other capital adjustments (shown in more detail on pages 12-13) are accrual adjustments to Net Cash Farm Income, which result in Net Farm Income -- a more accurate reflection of actual farm business profitability. Net Farm Income represents the return to the operator's and family's unpaid labor, management, and equity capital investment.

Profitability and Liquidity Measures -- pages 13-14

These reports provide a number of measures of performance. Profitability measures the value the farm has produced for the resources contributed. Measures reported (net farm income, labor and management earnings, rate of return on assets, rate of return on equity, operating profit margin, and the asset turnover rate) are calculated with assets valued at both cost and market basis.

Liquidity measures the ability of a business to meet its financial obligations; including family living, taxes and debt payments. Measures reported (the amount available to service intermediate debt and the years required to turnover intermediate debt) are provided on both a cash and an accrual basis. Both measures are determined after providing for family living and taxes, and for servicing real estate debt.

Balance Sheets -- pages 15-16

Two separate Balance Sheet reports are provided, one at cost basis and the other at market basis for assets. These balance sheets provide a categorical listing of all assets, liabilities, and equity.

Solvency measures are also provided on the Balance Sheets. The percentages shown represent the percent in debt for current assets, current & intermediate assets, long term assets, and the total assets of the business.

Statement of Cash Flows -- page 17

This table reports all the sources from which cash was generated, where cash was used, and what remains at year-end. It starts with the Beginning Cash Balance and concludes with the Ending Cash Balance. Cash from Operating Activities represents inflows and outflows from ordinary farming and non-farm activities. The result is a net Cash from Operations. Cash from Investing Activities reports the cash inflows and outflows from the purchase and sale of farm and non-farm assets and investments. The result is a net Cash from Investing Activities. Cash from Financing Activities represents cash inflows from money borrowed and gifts received, and outflows for principal paid and gifts and dividends given. The result is a net Cash from Financing Activities. The Net Change in Cash Balance is the sum total of the cash position from each of the three activities.

Crop Production and Marketing Summary -- page 18

This table contains three sections. The Acreage Summary reports the owned and rented acres in the farm business. The Average Price Received section reports the average prices received for crops sold -- actual sales only. The Average Yield per Acre section reports the average yields of the various crops produced. Results are shown only where there was a total of five or more in the group.

Financial Standards Measures -- page 20

The Financial Standards Measures are the sixteen financial measures selected by the Farm Financial Standards Task Force of the American Bankers Association. These ratios are explained on page 20.

Operator and Labor Information -- page 21

The Operator and Labor Analysis summarizes the results per operator and the labor utilized in the operation of the farm business, both paid and unpaid. It also provides a calculated value of farm production per hour of labor, and a net farm income per unpaid hour. These measures could be considered measures of labor efficiency.

Household & Personal Expenses and Non-Farm Summary -- pages 22-23

The Household and Personal Expenses is a detailed summary of expenditures by farm households that maintained a record of their household spending. The Non-Farm Summary is a report of non-farm income, expenses and liabilities.

Financial Guideline Measures

The Farm Financial Standards Task Force recommended the use of these financial measures to evaluate a farm's financial position and financial performance. These measures are grouped by: Liquidity, Solvency, Profitability, Repayment Capacity, and Efficiency.

Liquidity:

Liquidity is the ability of the farm business to meet financial obligations in a timely manner, without disrupting normal business operations.

Current Ratio: The current ratio shows the value of current assets relative to current liabilities. It measures the extent current farm assets, if liquidated, would cover liabilities that are due during the next 12 months. The higher the ratio, the safer the short term position.

Working Capital: Working capital shows the dollar amount that current assets can or cannot cover current liabilities. It approximates the amount of capital available to purchase crop and livestock inputs and equipment necessary to produce farm products. The amount of working capital considered adequate must be related to the size of the farm business.

Working Capital to Gross Revenues: Measures operating capital available against the size of the business.

Solvency:

Solvency is important in evaluating the risk position of the farm and family and in considering future borrowing capacity. Solvency measures the ability of the business to pay off all debts if liquidated.

Farm Debt To Asset Ratio: The farm debt to asset ratio measures the financial position or solvency of the farm or ranch by comparing the total liabilities to the total assets. It measures the portion of the farm assets that have debt against them. A higher ratio is considered an indicator of greater financial risk.

Farm Equity To Asset Ratio: The farm equity to asset ratio measures the farm equity relative to the value of the farm assets. It measures the proportion of the farm assets financed by the owner's equity whereas the debt to asset ratio measured the proportion of farm assets financed by debt.

Farm Debt To Equity Ratio: The farm debt to equity ratio measures the amount of farm debt relative to the amount of farm equity. It measures the amount of debt the farm has for every dollar of equity.

Profitability:

Profitability is the measure of the value of goods produced by the business in relation to the cost of resources used in the production. Profitability calculated on a cost basis does not consider changes in market valuation of capital assets such as machinery and breeding livestock.

Rate of Return on Assets: Rate of return on assets is, in effect, the interest rate your farm earned in the past year on all money invested in the business. If assets are valued at market value, the rate of return on investment can be looked at as the "opportunity cost" of investing money in the farm instead of alternative investments. If assets are valued at cost (cost less depreciation), the rate of return represents the actual return on the average dollar invested in the business.

Rate of Return on Equity: Rate of return on equity is, in effect, the interest rate your investment in the business earned in the past year. If assets are valued at market value, this return can be compared with returns available if the assets were liquidated and invested in alternative investments. If assets are valued at cost, this represents the actual return to the amount of equity capital you have invested in the farm business.

If your return on assets is higher than your average interest rate, your return on equity will be still higher, reflecting the fact that there are residual returns to equity capital after paying all interest expense. This is positive use of financial leverage. If your return on assets is lower than your average interest rate, your return on equity will be still lower, reflecting the fact that borrowed capital did not earn enough to pay its interest cost. This is negative financial leverage. Profitability becomes a key concern when substantial debt capital is used in the business.

Net Farm Income: Net farm income represents the returns to labor, management, and equity capital invested in the business. Without income from other sources, or appreciation of capital asset values, net farm income must cover family living expenses and taxes, or net worth will decrease.

Operating Profit Margin: The operating profit margin is a measure of the profit margin from the employment of assets. It measures how effectively you are employing assets relative to the value of output produced. Low prices, high operating expenses, or production problems are all possible causes of a low operating profit margin.

EBITDA: This factor stands for: Earnings Before Interest, Taxes, Depreciation and Amortization. This represents a measure of earnings available for debt repayment.

Repayment Capacity:

Repayment capacity shows the borrower's ability to repay term debts (longer than one year) on time. This includes non-farm income, and is therefore not a measure of business performance alone.

Capital Debt Repayment Capacity: Measures the amount generated from farm and non-farm sources, to cover debt repayment and capital replacement.

Capital Debt Repayment Margin: The amount of money remaining after all operating expenses, taxes, family living costs, and scheduled debt payments have been made. It is the money left, after paying all expenses, which is available for purchasing/financing new machinery, equipment, land or livestock.

Replacement Margin: The replacement margin is the amount of income remaining after paying principal and interest on term loans and unfunded (cash) capital purchases.

Term debt coverage ratio	3.63	0.94	3.19	4.91
Replacement coverage ratio	2.93	0.79	2.58	3.9
Efficiency				
Asset turnover rate (cost)	48.0%	36.3%	50.6%	50.9%
Operating expense ratio	64.7%	86.3%	66.9%	59.9%
Depreciation expense ratio	5.0%	4.9%	5.0%	4.8%
Interest expense ratio	3.4%	5.4%	3.7%	2.7%
Net farm income ratio	27.1%	3.4%	24.6%	32.9%

Term Debt Coverage Ratio: The term debt coverage ratio measures that ability of the business to cover all term debt payments. A number less than 1.00 percent indicates that the business, plus non-farm income, is not generating sufficient cash to meet all of the debt payments, after family living expenses and taxes have been paid. A number greater than 100 indicates the business is generating sufficient cash to pay all term debt obligations with some surplus margin remaining.

Replacement Margin Coverage Ratio: This represents the ability to term debt and unfunded capital purchases. A ratio under 1.0 indicated that you did not generate enough income to cover term debt payments and unfunded capital purchases.

Efficiency

These measures reflect the relationship between expense and income items to revenue and the efficiency of the farm business with regard to the use of cash and capital assets.

Asset Turnover: Asset turnover is a measure of how efficiently assets are used in the business. A farm with good operating profit margin and asset turnover will show a strong rate of return on farm assets. If operating profit margin is low, the asset turnover rate must be strong, or vice versa, to maintain the rate of return on assets.

Operating Expense Ratio: This ratio indicates the percent of the gross farm income, which is used to pay the operating expenses. Operating expenses do not include interest or depreciation expense.

Depreciation Expense Ratio: This ratio indicates the percent of the gross farm income, which is used to cover the depreciation expense.

Interest Expense Ratio: This ratio indicates the percent of the gross farm income, which is used to pay farm interest expenses.

Net Farm Income Ratio: The ratio indicates the percent of the gross farm income, which remains after all expenses.

**MONEY SPENT BY THE AVERAGE SOUTHWEST, SOUTH CENTRAL and SOUTHEAST
MINNESOTA FARM OPERATOR – 2012**

EXPLANATION OF INDIVIDUAL CROP ENTERPRISE ANALYSES

The individual crop enterprise analysis tables show acres, yield, value per unit (at harvest time), and gross return for each crop raised. Crops raised on owned and rented land are analyzed separately. This allows the farm business operator to evaluate the costs and returns for each individual crop.

Costs for seed, fertilizer, chemicals, fuel, repairs, custom hire, utilities, etc. are assigned to each crop by the farm operator and are termed *Direct Costs*. Other costs not directly assigned by the operator are called *Overhead Costs* and are allocated by formula. All costs are actual costs; no opportunity costs are included.

Be aware of two differences between the Owned Land and Cash Rented Land tables. On cash rented land, the land cost is identified and included in the Direct Cost section. In the case of owned land, the land cost is actually divided and reported on two different lines in the Overhead Cost section representing land ownership costs -- real estate taxes and interest on long term debt.

In addition to the average for each crop, farms are classified into low 20% and high 20% on the basis of returns to overhead costs. This classification is done separately for each table where there are at least five farms in the category.

EXPLANATION OF INDIVIDUAL LIVESTOCK ENTERPRISE ANALYSES

Productive livestock enterprises are an important part of many Minnesota farm businesses. Many farms have one or more livestock enterprises. The following tables pertain to these livestock enterprises. Statistically, a larger data base provides more credibility. In an effort to increase the credibility and usefulness of the livestock enterprise analyses and to allow the inclusion of more livestock tables, statewide (rather than regional) data was used in computing the following livestock tables.

Costs that are easily charged to a specific livestock enterprise are termed *Direct Costs*. This category includes costs such as feed, veterinary costs, livestock supplies, custom hire, and marketing.

Other costs are less easily charged directly, and are allocated by formula. These are termed *Overhead Expenses*, and include things like interest, depreciation, dues, insurance, etc.

The table format varies slightly for the different livestock enterprises. Each begins with a calculation of Gross Return with income generated (product sales, market animal sales, cull breeding stock sales, value of butchers, and/or transfers out to other enterprises) minus costs incurred (purchases, transfers in) and adjusted for inventory changes. The Direct and Overhead Expenses are then applied to arrive at the Net Return from the enterprise, typically on a per cow, per head, or per cwt basis.

Each livestock enterprise analysis also includes *Other Information* that provides production and efficiency data that indicate the strengths and/or weaknesses of the enterprise.
